

## UCP Guideline

### Practical Guidelines

#### TODOs

- Relevant lecture recording along with the practical supplementary video material **must** be referred before the practical session.
- All pre-labs must be attempted before the practical session.
- Stick to the tutorial class of your preference for long term and not swapping the class in the middle of the semester.

*You may try attending to sessions from different tutors to choose your preference in the beginning. Please note that tutorial sessions in UCP follow a strict delivery plan and the tutors need to keep track of students and their progress during tutorials throughout the semester to deliver better learning experience to students.*

- Sample code provided in Wiki is **ONLY** for your reference to better understand the concepts.

*Do not copy paste them into your work if you are unable to understand the sample code. Please ask help from your tutor for further assistance.*

#### NOT TODOs

- Avoiding practical sessions and not being able to cover the weekly tutorial content during the week.

*If you miss a tutorial class, you may attend to some other available UCP tutorial session during the week to get it covered. You are responsible to cover the tutorial content for the past weeks you have missed.*

- Continue to swap / jump to random tutorial sessions throughout the semester.

## Assignment Guidelines

### TODOs

- All work should **strictly follow** assignment specification and assignment specification **ONLY!**
  - Do not implement any additional or nice to have features in your submission  
*i.e. No splash screens, no multiple colors, no story plots or fancy stuff, etc.*
  - Strictly implement the requirements stated in the assignment specification **ONLY!**
- Assignment **MUST be compilable** into the **specific executable name (case-sensitive)** stated in the assignment specification.
- Assignment submission **MUST be zipped and should include:**
  - Checklist document
  - The **“report.xlsx”** excel sheet
  - The code
- **Assignment submission zip file information**
  - File Name: <STUDENT\_ID>\_<TUTORIAL\_DAY>\_<24HOURTIME>.zip
  - <STUDENT\_ID>: student id of the student
  - <TUTORIAL\_DAY>: one of MON, TUE, WED, THU, FRI (*case sensitive*)
  - <24HOURTIME>: in the format: 1300\_1500

i.e.

19450067\_THU\_1300\_1500.zip

19450068\_THU\_0900\_1100.zip
- **Late assignments are not accepted in UCP.** For further details, refer to UCP unit outline.

## Coding Guidelines

### TODOs

- It is recommended to use “**Curtin Coding Standard for C Programming**” document (*refer to blackboard*) during your practical and assignment submissions
- Critical coding standard violations (as stated in the assignment specification) will be highly penalized during assignment marking.
- Modularity and readability of your code will always be considered during the marking of your assignment work.
- You should always follow the coding layout / standards / tips discussed in the practical session.
- Always ask your tutor for tips / help on code layout, clarity and readability if you are unsure about the code you have written.
